

# What Is A CSV & TXT File?

A CSV & TXT file are common file types for storing a data feed (electronic inventory of your e-Commerce product).

When selecting this CSV and TXT file option you can upload the product data feed file directly from your local system or from your remote server.

Steps to upload a datafeed file from your PC:

1. Go to Dashboard > Products Page
2. Select CSV and TXT file option at Retrieve your datafeed section.
3. You will observe the below uploader

---

**CSV and TXT File** [Help](#)  
Using this option you can upload the products data feed file directly from your local system or from your remote server.

---

**Upload File**  
File Name :

---

To upload a file from your local system just click on browse button to select a file and then click on

Upload File button to start file upload.

Once you finish file uploading and mapping you can schedule file to retrieve the products data
